# SUBJECT INDEX

*N*-Acetyl-D-galactosamine, lectins specific for, 127
*N*-Acetyl-β-D-glucosaminyl-binding properties of HIV-1 glycoprotein, 79
*N*-Acetyl-, *N*-glycoloyl-, and *N*-acetyl-9-lactoyl-neuraminic acid in fetal and adult bovine tissues, 353
*N*-Acetyllactosaminooligosaccharides affinity for wheat germ agglutinin of, 169
Adherence protein, Gal-GalNAc lectin as an, 331
Agglutinin of peanut, saccharide specificity of, 59
Agglutinin of soybean, precipitation of concanavalin A by, 69
Aminoalkenyl–acrylamide copolymers, *O*-glycosyloxyalkenyl–, fluorescein-labeled, 339

Bark lectin, relation of seed lectin of elderberry to, 7
Bovine heart lectin, binding specificity of, 293
Bovine tissues, fetal and adult, sialic acids in, 353

*Canavalia gladiata*, agglutinin from, 275
Cancer, colorectal, lactose-binding lectins in, 47
*Channa leucopunctatus* (Murrel) plasma, T-antigen lectin from, 251
Colorectal cancer, lactose-binding lectins in, 47
Concanavalin A, sandwich enzyme-linked immunosorbent assay of D-mannans of *Candida albicans* using, 325
Concanavalin A, precipitation by soybean agglutinin of, 69
Conjugates of poly(ethyleneglycol) and *Ricinus communis* agglutinin I, synthesis and carbohydrate-binding activity of, 309
CSL lectin, glycoprotein ligands in hepatoma cells linking to, 117

Elderberry, lectin from the seed of, 7
*Entamoeba histolytica*, D-galactose-inhibitable lectin of, 331
Epiglycanin, intracellular pathway of, 185

Fibronectin-opsonized particles, participation of D-galactose-specific receptors in recognition of, 201
Fluorescein-labeled *O*-glycosyloxyalkenyl–aminoalkenyl–acrylamide copolymers, 339
Forssman glycolipid, decreased biostnyhesis induced by retinoic acid treatment of teratocarcinoma cells, 155
Forssman glycolipid, lectin-affinity chromatography of oligosaccharide derived from, 155
Fresh-water fish plasma, T-antigen lectin from, 251

α-L-Fucosyl group of *N*-glycan of *Wistaria floribunda* lectin, (1→3)-linked, 27

D-Galactosamine, *N*-acetyl-, lectins specific for, 127
D-Galactose-inhibitable lectin of *Entamoeba histolytica*, 331
D-Galactose, lectins specific for, 127
D-Galactose-specific receptors of liver macrophages, participation in recognition of fibronectin particles of, 201
β-D-Galactoside-binding lectins from murine epithelial cell line, purification of, 345
*Galanthus nivalis* lectin, interactions of, 109
Galaptin, binding by hydroxylysine-linked saccharides of, 321
β-D-Gal*p*-(1→5)-hydroxylysine, binding of galaptin by, 321
β-D-Glucosaminyl-, *N*-acetyl-, binding properties of HIV-1 glycoprotein, 79
α-D-Glc*p*-(1→5)-β-D-Gal*p*-(1→5)-hydroxylysine, binding of galaptin of, 321
*N*-Glycan of *Wistaria floribunda* lectins, (1→3)-linked α-L-fucosyl group of, 27
Glycolipids and neoglycolipids, use in the study of bovine heart lectin of, 293
Glycoprotein lectins, glycosylation of, 215
Glycoprotein ligands binding to CSL lectin in hepatoma cells, 117
*N*-Glycosylation, effect on lectin activity of recombinant ricin B chain of, 19
Glycosylation of glycoprotein lectins, 215
*O*-Glycosyloxyalkenyl–aminoalkenyl–acrylamide copolymers, fluorescein-labeled, 339

Heart lectin, bovine, binding specificity of, 293
Hepatoma cells, CSL lectin binding to glycoprotein ligands in, 117
*Hippeastrum hybr.* lectin, interactions of concanavalin A, interactions of, 109
Histochemistry, lectin, application to lysosomal storage diseases of, 229
HIV-1 glycoproteins, *N*-acetyl-β-D-glucosaminyl-binding properties of, 79
Human HL60 cells, intracellular D-mannose-specific receptor from, 95
Human T lymphocyte membrane, effect of mitogenic stimulation on lectins of, 283
Hydroxylysine-linked saccharides, binding by galaptin of, 321

Intracellular D-mannose-specific receptor from human HL60 cells, 95

Jacalin sacharide-specificity, comparison of peanut saccharide-agglutinin specificity with, 59
Jack bean, Japanese, agglutinin from, 275
Japanese jack bean, agglutinin from, 275

Lactosaminooligosaccharides, *N*-acetyl-, affinity for wheat germ agglutinin, 169
Lactose-binding lectins in colorectal cancer, 47
Lectin histochemistry, application to lysosomal storage diseases of, 229
Lectin research, early history of, 1
Lectins from murine epithelial cell lines, β-D-galactoside-binding, purification of, 345
Lectins in human T lymphocyte membrane, effect of mitogenic stimulation on, 283
Lectins, glycoprotein, glycosylation of, 215
Lympocytes of rat, sialidase-treated, reversible binding by peritoneal macrophages of, 263
Lysosomal storage diseases, application of lectin histochemistry to, 229

Macrophage cells, mouse, D-mannose receptor from, 145
Macrophages of liver, participation of D-galactose-specific receptors in recognition of fibronectin particles in, 201
Macrophages, peritoneal, reversible binding of sialidase-treated rat lymphocytes by, 263
Macrophages, rabbit alveolar, D-mannose 6-phosphate receptor of, 37
Mammary tumor cells, intracellular pathway of a membrane glycoprotein of, 185
D-Mannan of *Candida albicans* NIH A-207 and NIH B-792, sandwich enzyme-linked immunosorbent assay of, 325
D-Mannose 6-phosphate receptors, binding specificity of, 37
D-Mannose receptor, mouse, properties of, 145
D-Mannose-specific lectins, interaction of five, 109
D-Mannose-specific receptor, intracellular, from human HL60 cells, 95
Mouse D-mannose receptor, properties of, 145
Murine epithelial cell line, purification of β-D-galactoside-binding, lectins from, 345

*Narcissus pseudonarcissus* lectin, interactions of, 109
Neuraminic acid, *N*-acetyl-, *N*-glycoloyl-, and *N*-acetyl-9-*O*-lactoyl-, in fetal and adult bovine tissues, 353

Pathway, intracellular, of epiglycanin, 185
Peanut agglutinin, saccharide specificity of, 59
*Pisum sativum* lectin, interactions of, 109
Polyclonal rabbit anti-*C. albicans* antisera, sandwich enzyme-linked immunosorbent assay of D-mannans using, 325
Poly(ethyleneglycol)–*Ricinus communis* agglutinin I conjugates synthesis and carbohydrate-binding activity of, 309

Rabbit alveolar macrophages, D-mannose 6-phosphate receptor of, 37
Recombinant ricin B chain, effect on lectin activity of *N*-glycosylation of, 19
Retinoic acid, decreased biosynthesis of Forssman glycolipid after treatment of teratocarcinoma cells by, 155
Ricin B chain, recombinant, effect on lectin activity of *N*-glycosylation of, 19
*Ricinus communis* agglutinin I–poly(ethyleneglycol) conjugates, synthesis and carbohydrate-binding activity of, 309

Seed of elderberry, lectin from, 7
Sialidase-treated rat lymphocytes, reversible binding by peritoneal macrophages of, 263
Soybean agglutinin, precipitation of concanavalin A by, 69

T-antigen lectin, isolation from *Channa leucopunctatus* (Murrel) plasma of, 251
T lymphocyte membrane, human, effect of mitogenic stimulation on lectins of, 283

Wheat germ agglutinin, affinity of *N*-acetyllactosaminooligosaccharides for, 169
*Wistaria floribunda* lectins, (1→3)-linked α-L-fucosyl group of *N*-glycan of, 27
